Check out a member of Pitt NSA's super cute pets!

MEME OF THE WEEK

Submit a nursing meme to be featured in the newsletter!

IMPORTANT LINKS

Find links to event attendance forms, interest forms, committees, and submissions for our next newsletter!

Pitt NSA has a website!
Check it out HERE!

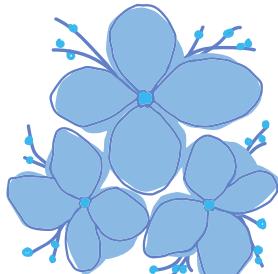

Explore our website to meet the board, reference old Stethoscopes and GBM slides, see what's next on our calendar, and find any important links!

General feedback form
HERE!

Fill out this form to leave any comments or ideas about NSA so we can better serve you.

Financial feedback
form HERE!

Fill out this form for any financial questions or concerns that we can help you with. This can be anonymous if you wish.

NCLEX Question of the Week

The home care nurse visits a client diagnosed with acquired immune deficiency syndrome (AIDS). The nurse instructs the client's caregiver about how to prevent infection. Which is the **most** important instruction the nurse will give to the caregiver?

1. "Cover your nose and mouth when you sneeze or cough."
2. "Get rid of all pets in the home."
3. "Wash your hands frequently."
4. "Wash the client's dishes separately."

Fill out this interest form and join us for our first event of the semester!

Join our Social Committee HERE to help plan and run fun events for NSA members!

 SIP AND SOCIAL
hot chocolate

Thursday, January 29th
125 Victoria 7:00 P.M

Our next GBM is tomorrow, January 26th at 7:30pm

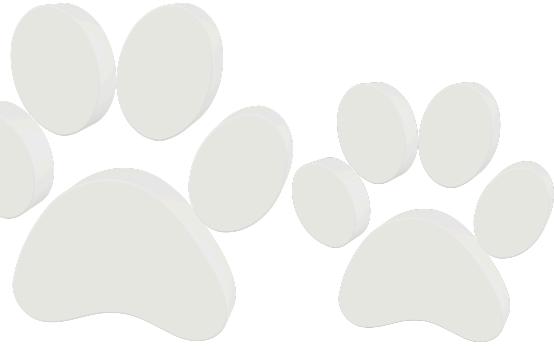

Join us VIRTUALLY on zoom due to the snow storm. More information to be be shared by email!

Pet of the Week

Macie

Corgi

NCLEX Answer:

3. "Wash your hands frequently." (Correct Answer)

Hand hygiene is the single best way to kill germs. The caregiver should wash hands after going to the bathroom and before and after fixing food. The caregiver should also wash hands before and after caring for the client.
